Summary

Student at 42 School, curious, persevering, and autonomous. I developed skills in TypeScript, JavaScript, React, C, C++, PHP, and Python through multiple projects. Rigorous and motivated by problem solving, I am looking for a 6-month internship to contribute to concrete projects, deepen my experience, and keep growing within a team.

Professional Experience

- Full-Stack Developer - Internship, Youdy Start-up** 2024
Maintained and evolved the web platform, migrated the React project to Next.js, wrote end-to-end tests, identified and fixed bugs, and debugged source code. Paris Station F
- Hackathon, Drone Defense Hackathon** 2025
Developed a mobile application for drone fleet management and a back-end interface to manage devices, validate mission deployment, and track their real-time progression. Paris

Formation

- 42 School** 2024 – 2026
Built strong foundations in low-level programming, memory management, and network communication through individual and collaborative projects, strengthening rigor, perseverance, autonomy, and technical curiosity. Paris
- Webacademie by Epitech** 2022 – 2024
Learned the fundamentals of web development with HTML, CSS, JavaScript, and PHP, and became familiar with frameworks such as React, Laravel, and Symfony. Paris

Projects

- MInishell, langage C**
Robust Bash clone in pure C. Lexical parsing with precise quote handling, stream redirection, multi-level pipes, POSIX signals, and native built-ins.
- Irc, langage C++**
Developed a complete and robust Internet Relay Chat server compliant with RFC 1459 and 2812. Non-blocking asynchronous multi-client handling (poll/epoll), chat channels, user/channel modes, authentication, and memory-safe data transfers.
- Transcedance, technologies NextJs, TypeScript et Docker**
Online multiplayer gaming platform featuring authentication, player rankings, friend management, and real-time chat. The game adapts the "Quart de singe" concept into an online multiplayer experience.
